### **Something Worth Reading:**

Business in the past was not as it is today. Conditions change. Competition is becoming keener, organizations more complex, and the problem of management control more dependent on complete and reliable information.

Business efficiency is measured by accountants. The best accounting skill is required to show an executive what it costs him to do business, that he may work intelligently toward big results. Accountancy is a highly specialized function. A competent accountant is a business pilot. His charts furnish a safe, reliable course, and warn of dangers ahead. Would your business bark be safe in the hands of inexperienced navigators?

Maintaining an adequate cost system is not an expense in the true sense of the word. It is business insurance. Therefore, it is the last thing you can afford to be without.

You are in business for net profit, and the services of a competent accountant, who constantly analyzes your costs, and interprets the results of all your financial operations, are very valuable to the cause of sound business policies. This is a progressive business world, and you can not afford to work under a handicap.
