## Study Hall

Now let me introduce you to some of the classes offered at SHS. First we will look in on the Study Hall in Room 30 which is supervised by Mrs. Peterson.

## Latin

Next we skip over to the Language Department and into Mr. Hofmeister's Latin class, where students are busy studying verb declensions, word cases, and derivatives.

## Spanish

Across the hall now and into Mrs. Anderson's Spanish class. Reading printed Spanish papers and international correspondence are encouraged in this language study.

## U. S. History

Introducing U. S. History, a required subject taught by Mr. Schepman which includes study of the growth of the nation, government proceedings, and a civics course.

## Social Studies

A freshman course for background history of our nation, library technique, study of driving and the vehicle code. Meet Mrs. McCoy, instructor of Social Studies.

## Economic Problems

Our next stop is Mr. Johnson's Economic Problems class. This is an upper class subject where we meet students interested in the financial resources of the nation.

## Home Economics

The next class we visit is Home Economics, taught by Miss Fowler. We are just in time to see a well-balanced meal being planned and prepared by the students.

## Basic Drawing

We move over to the Art Department and see Miss Boberg instructing Basic Drawing students in fundamentals of composition, art expression, and outdoor sketching of campus views.

## Clothing

As we enter this room we see girls working on patches, darning, button-holes, pattern adjustment, and color harmony. Mrs. Martin is consultant in this Clothing class.

## Mech Drawing

In Mechanical Drawing, taught by Mr. Rotsch, students learn dimensional drawing, printing, architectural drafting, and elevation plan drawing. This is a good course for developing precision.

### Advanced Agriculture

Advanced Agriculture is an elective course taught by Mr. J. M. Lewis. It offers an introduction to the feeding, judging, breeding, and managing of livestock through on the spot field trips.

### Library

Our Library contains complete references on any subject, magazines, and books for class work and recreational reading. It is presently used for an overflow study hall supervised by Miss Smith.

### Retail Selling

Sales techniques, display and merchandise arrangements are included in Retail Selling, taught by Mr. Krebs. These students you are meeting will be greeting you in all types of business houses in a short time.

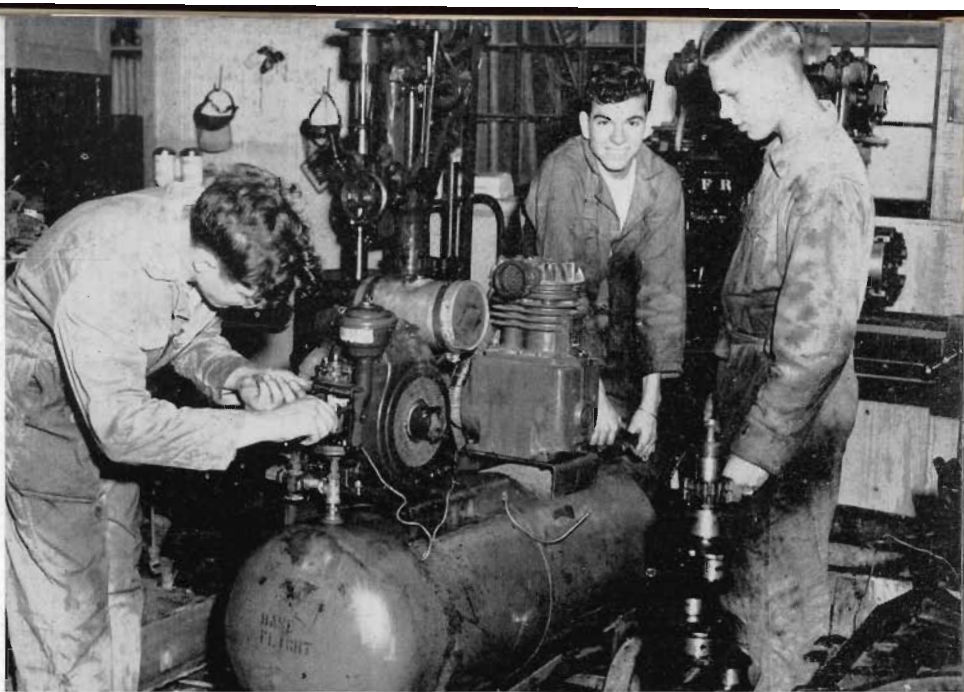

### Bookkeeping

Keeping an accurate set of books and ledgers, actual and basic practice in office and bookkeeping fundamentals are given to Commercial students in Mr. Carmichael's Bookkeeping class.

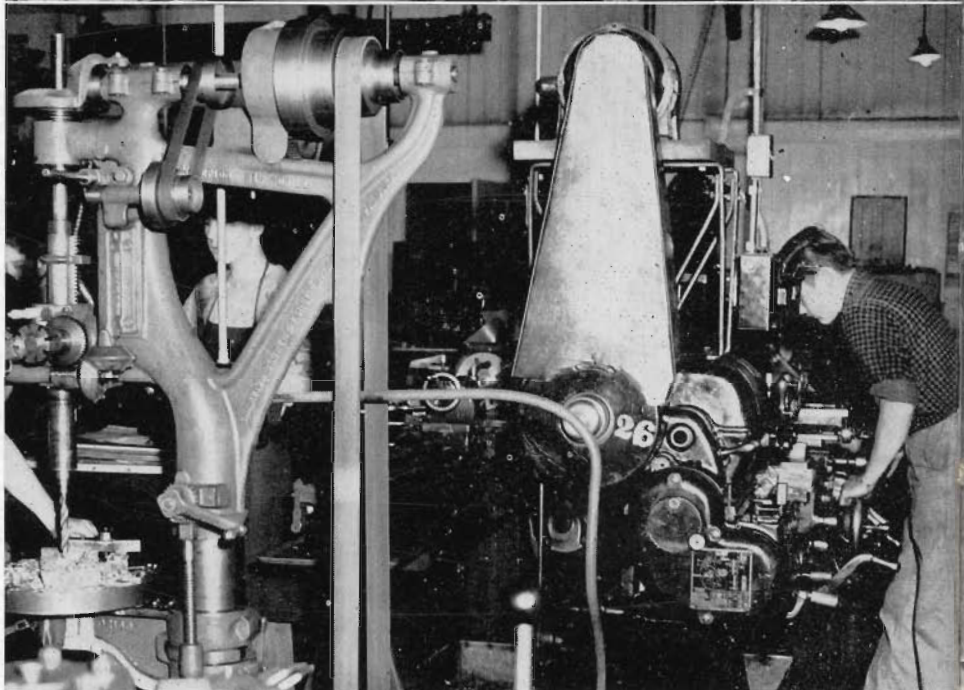

## Auto Repair

Repairing their own cars right in class, also learning to keep them in top condition by actual investigation and charts. Mr. Libhart's Auto Repair Shop class offers all these opportunities.

## Machine Shop

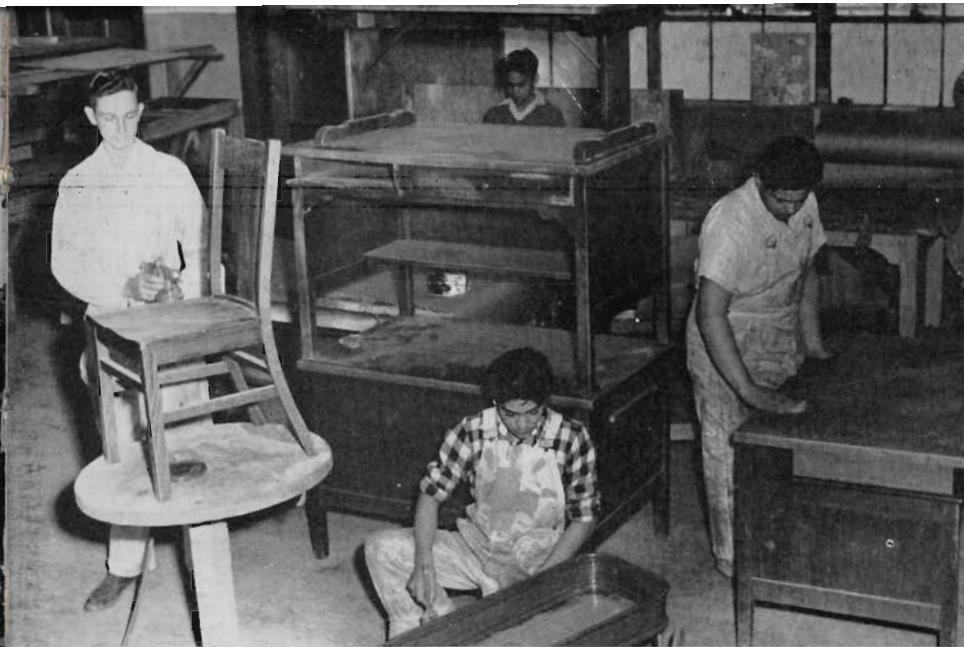

In Machine Shop boys are given the opportunity to operate and repair machines and learn the use of many tools. This is a good subject in which to learn the machinist trade and is taught by Mr. Milligan.

## Paint and Decoration

Refinishing desks to remove initials, varnishing school furniture, sign making, spray and hand painting are included in Mr. Stewart's Painting and Decorating class.

## Mill Cabinet

Mill Cabinet is a regular vocational class taken by boys planning jobs in mill work. This class, taught by Mr. Van Vlear, consists of teaching boys the building and mill trimming of furniture used by many of the schools.

## Print Shop

Right off the press, thanks to these fellows in our Print Shop. Under the supervision of Mr. Geddes, they print the Guard and Tackle weekly and learn to operate the Linotype and folding machines.

## Electricity

We now journey to the Fremont School where Mr. B. Young's SHS Electricity students are taught to hook up circuits, make synchronous motors, code sets, and electrical implements.

## Typing

Now to meet students occupied by pecking speedily away on budgets, speed drills, and composition at the machine. This Typing class is instructed by Miss Eberhard.

## Office Methods

Entering another business training classroom we find students working at various machines used in offices. They are being taught Office Methods by Mrs. Schuler.

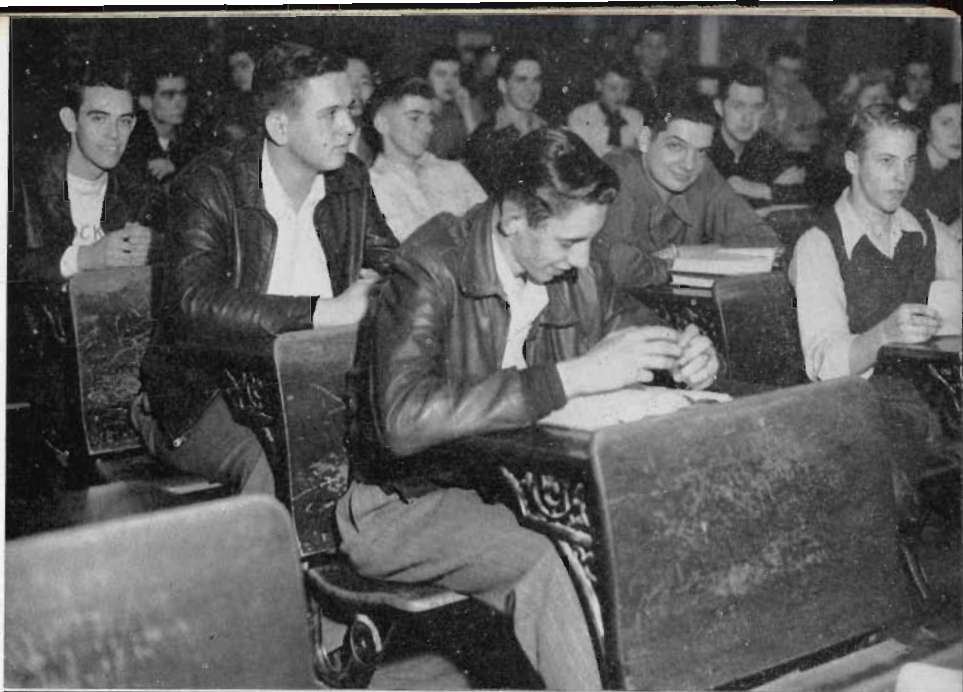

## Stenography

Continuing our tour of classrooms we find Mr. Blim's Stenography class busily engaged in reading and writing crooked little lines that actually mean something.

## Trigonometry

Trigonometry, a subject for Math majors, is taught by Miss Tully. It includes advanced study of Geometry and Algebra necessary for engineering, aviation, and science.

## Algebra

Instructed by Mr. Reed, Algebra students work away substituting  $X$  and  $Y$  in confusing work problems and drawing graphs to represent costs and distances.

*John Reed*

## General Math.

Now to meet our third class in Mathematics. General Math is taught by Miss Dunn and offers freshmen drill on fundamentals recommended for higher studies in the field.

## Harmony

In one of the several music classes open to students we meet Miss Scott giving some pointers of the piano to her Harmony class. Students learn the fundamentals of harmony in this course.

## Girls Glee

Girls' Glee is another course of the Music Department offering girls a chance in group singing and harmony sometimes presented at assemblies and other programs. This group is under the direction of Mr. Smith.

## Public Speaking

We now enter Miss Green's Public Speaking class to find the students practicing for an extemporaneous speech contest they will enter. Speeches are given at luncheons, assemblies, and over the radio.

## World Literature

Miss Harris is giving her students a speedy tour to many countries as they study World Literature. Speakers on literature of various countries are sometimes heard.

## Boys P. E.

Circling the track at top speed, calisthenics, first aid — all required in Boy's P. E. during the four year course. Cold, frosty mornings welcome these warm up exercises.

## Girls P. E.

Weekly folk dancing classes, tennis, archery, volleyball, hockey, and many other sports find their season among SHS girls. All agree that costume inspections are hardest work of Physical Education.

## English 2

Grammar, compositions, and the study of myths is required of all English 2 freshmen. Students may later choose other forms of English to supplement their English major. This class is taught by Miss Anderson.

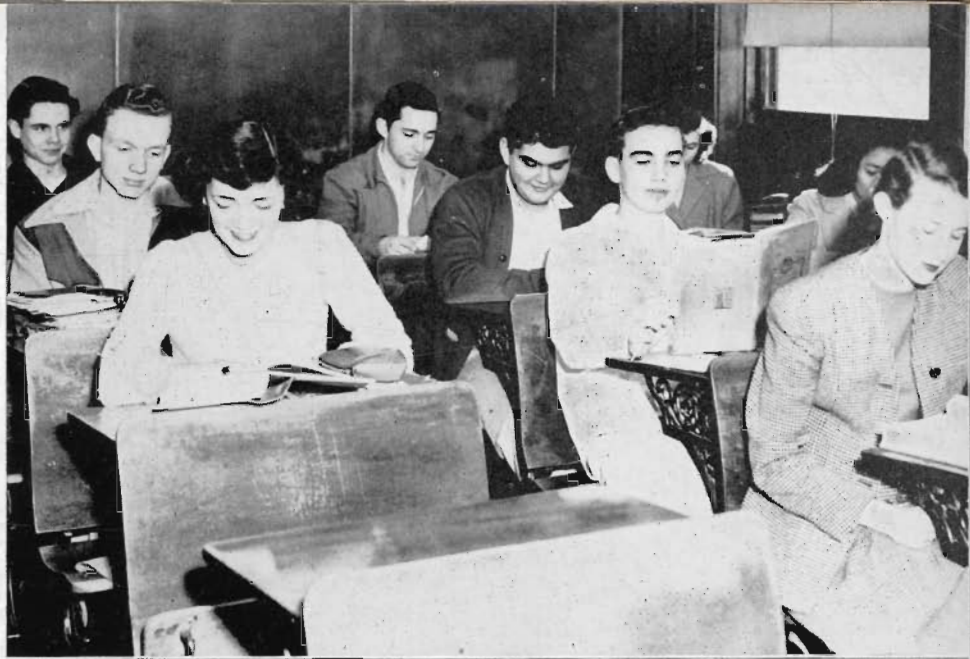

## English 3

English 3 includes a continuation of composition writing, spelling, and emphasis on punctuation. Poetry introduced and recreational reading encouraged by Mr. B. Lewis.

## News

These Newswriting students are learning to put out a paper by turning in weekly units on leads, heads, editorials, and feature and news stories. Taught by Mr. Adamson, this class also includes book reports and study of American Literature.

## Play Production

Drama fills the air as the curtain rises. Onto the stage step members of Mr. Ritchie's Play Production classes stepping into psychological characters, comics, and idealists.

## Play Production

Students learn to suggest, write, and enact skits for presentation at rallies and to English classes for drama appreciation. Stress is made on expression without fright and every class member participates.

## Chemistry

A burst of fire—a cloud of smoke. Screaming fire engines rush to the scene. Nothing alarming, only Mr. Sweet's Chemistry class trying to break down nitroglycerin. Just another peaceful day in the study of matter and its compounds.

## Physics 2

In Physics, seniors learn the use of washers in faucets, change of mechanical into electrical energy, and application of the laws of science. Instruction and experiment supervision by Mr. Spafford.

## General Science

General Science, an introductory science course offering fundamentals of all sciences including basic for chemistry, astronomy, and physics. Mr. McCain is the instructor.
