You'll get quicker service when you dial if you follow these simple steps:

1. Listen for the dial tone. This tone is your signal that the equipment is ready to take your call.
2. Dial each letter and digit of the number in its right order.
3. Draw the dial all the way to the finger stop.
4. Remove your finger and let the dial return naturally, without forcing or hurrying.
5. If you make a mistake while dialing, hang up for a few seconds and then start your call again.

Radar ranks high in the top bracket of new instruments that brought victory to the Allies. It was developed through years of research and experiment, chiefly in the United States and Great Britain. Scientists of Bell Telephone Laboratories and workers of Western Electric Company developed and supplied our Government with more radar equipment than any other supplier.
