Radar ranks high in the top bracket of new instruments that brought victory to the Allies. It was developed through years of research and experiment, chiefly in the United States and Great Britain. Scientists of Bell Telephone Laboratories and workers of Western Electric Company developed and supplied our Government with more radar equipment than any other supplier.

You'll get quicker service when you dial if you follow these simple steps:

1. Listen for the dial tone. This tone is your signal that the equipment is ready to take your call.
2. Dial each letter and digit of the number in its right order.
3. Draw the dial all the way to the finger stop.
4. Remove your finger and let the dial return naturally, without forcing or hurrying.
5. If you make a mistake while dialing, hang up for a few seconds and then start your call again.

**OUT of the  
 DISCARD**

A few minor repairs on that discarded article will restore its life of usefulness and convenience. You'll find the man who can help you listed in the

Radar ranks high in the top bracket of  
 new instruments that brought victory to  
 the Allies. It was developed through years  
 of research and experiment, chiefly in the  
 United States and Great Britain. Scien-  
 tists of Bell Telephone Laboratories and  
 workers of Western Electric Company  
 developed and supplied our Government  
 with more radar equipment than any  
 other supplier.
