

Stockton College
at work.....

Arts and ---

Dr. Irving Goleman

Dr. Irving Goleman has been with the college since 1937 and is division chairman of Arts and Letters since 1938. He is also connected with College of the Pacific as a professor of English and religious education. Dr. Goleman is among the most outstanding men of philosophy in the country.

Drama...

Home of the Thespians! Under the capable direction of Maxim Popovich, Stockton College has been able to carry on the high tradition of drama which is one of the trademarks of the school.

Mixed Chorus...

The popular and talented Mixed Chorus participates in many school activities and programs. Here the singers are presenting their annual Christmas Assembly.

Letters

*Best of Luck,
Claire
Janet Lovenberg*

Originality and new design are characteristics of the Art department. Some of the many courses offered in the Art department are weaving, painting, sculpturing, lettering and layout, jewelry making and ceramics.

Humanities...

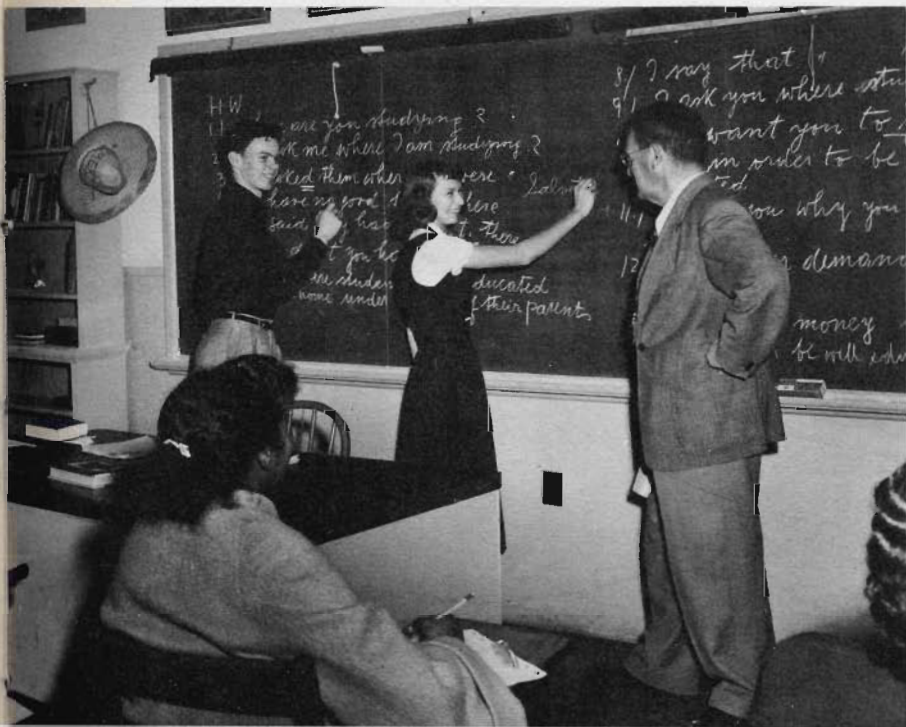

The wide study of humanities is in its general sense, the study of man and his civilization, his attitudes and beliefs as expressed through centuries of literature, art, music, and drama. World Literature and Art, Autobiography of Civilization, Literature and Society, and Exploring Stage and Screen are representative of the fine Humanities program offered at Stockton College.

Art...

A sure hand, patience, and a knowledge of materials are three assets an art student must have.

Language...

Customs of foreign countries are learned in addition to the fundamentals of languages in Spanish, Italian, French, German, and Latin classes at Stockton College.

Business ---

William Niven

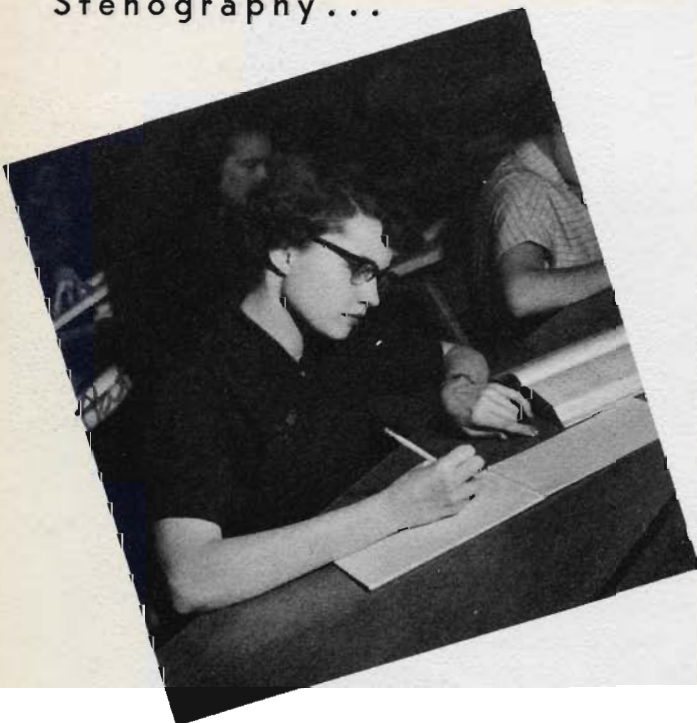

William Niven has been division chairman of the Business Department for two years. He teaches classes on both this campus and the College of the Pacific. Niven has a Masters degree in Business Administration and eight years of business experience before entering the field of teaching.

Bookkeeping...

A high degree of accuracy and patience is essential in the bookkeeping classes, as any business student will affirm.

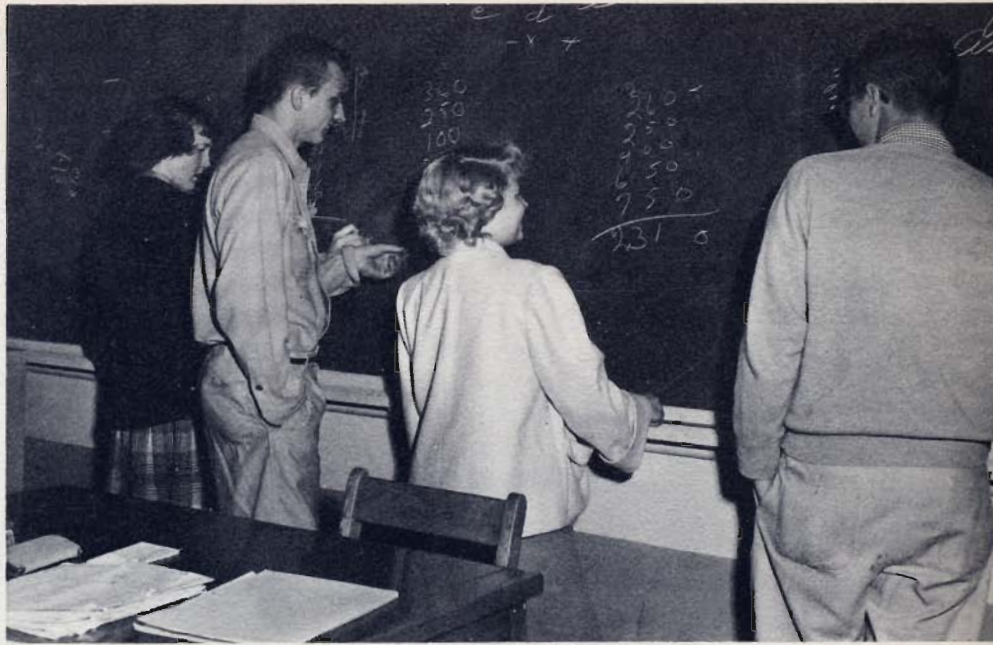

Stenography...

Secretaries are trained--- not born. The course at Stockton College helps the students to prepare for entering the field of business.

Communications

Students in the Business Math classes review everyday mathematical problems that come up in the business world. Both speed and accuracy are stressed.

Business Math...

Typing...

Typing courses are designed for students interested in learning to type proficiently. The students learn to type various forms and letters used in offices.

Office Appliances...

Students enrolled in Office Appliances are trained to operate machines commonly used in the field of business. Some of these machines are the mimeograph, dictaphone, and adding machine.

Communications ---

Charles M. Guss

Mr. Guss has been division chairman of the Communications Department since 1949. Before coming to Stockton College, Mr. Guss taught at Selma High School. He received his education at Pasadena College and at the University of Southern California.

English...

Concentration on basic skills is stressed in the English courses at Stockton College. A wide curriculum of literature and creative writing classes enjoy great popularity among advanced English students.

Speech...

The many speech classes offered at Stockton College give students the encouragement, confidence, and opportunity to express their ideas through public speaking. Among the speech classes taught are Debate and Speech Improvement. The latter class is available to students who have minor speech problems.

Division

The Collegian...

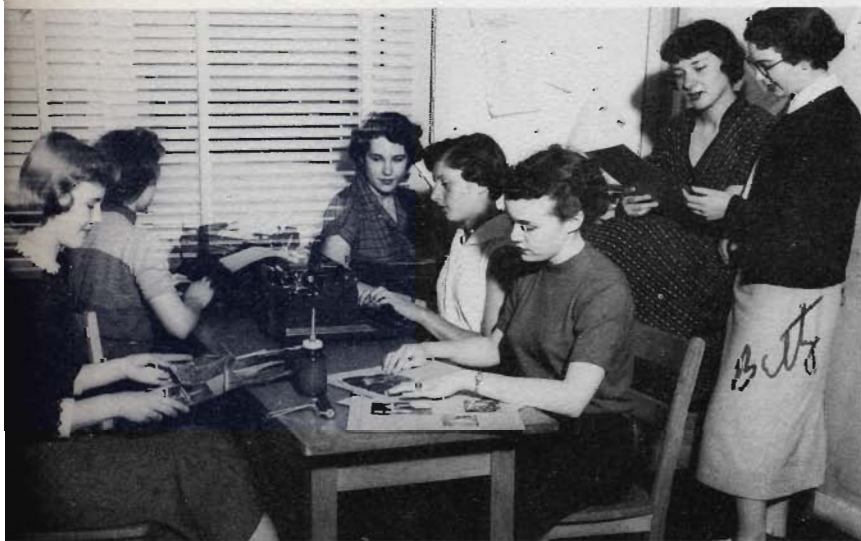

The Collegian, Stockton College's weekly newspaper, has stacked up for itself quite a list of accomplishments this year, some of which are a juvenile delinquency campaign and a safety campaign entitled "Crusade for Safety."

This publication holds in its hands the pulse of Stockton College and its office, the day before deadline, looks like one of any ordinary newspaper, with editors, reporters, copy-readers, and advertising staff all working together to get the paper out. "Deadline or dead duck" is a familiar phrase heard around The Collegian office during this time. Another item familiar to staff members is Saints and Sinners, "edited" by Advisor Ed Lewis. This credits individual students for outstanding work and points out their mistakes made in the preceding edition of the paper.

The Collegian was given first class honor rating during the fall semester under the editorship of Mary Jayne Krebs.

Radio and TV...

"You're on the air in five seconds!" These are familiar words to students in the Radio and Television class. It is one of the few courses at SC and COP in which the students actually learn while doing. KCVN is the popular radio station operated by SC and COP students.

El Recuerdo...

Producing the 1954 El Recuerdo was a tedious job at times, but staff members have memories of many good times shared by working together to meet deadlines. Innumerable hours have been spent on Saturday afternoons working --- and drinking cokes, which progressed the annual toward its completion.

The El Recuerdo office is known as a "home" on campus to the staff members and is a place to do homework, spend free periods, and even is shelter from a sudden downpour.

Trade and ---

Ralph Herring

Ralph E. Herring has been division chairman of Industrial and Agricultural Education since the 6-4-4 plan began in 1948. He was acting chairman the first two years and then was appointed as the regular chairman. He is a graduate and former teacher of Stockton High School.

Auto Mechanics...

In the Auto Mechanics shop, students may be seen busily working to repair various parts of the car. Shop demonstrations are given to help students learn the common causes of car troubles and how to repair them.

Body and Fender...

With the highway accident rate mounting steadily, jobs are assured for students trained in the Body and Fender trade. "Custom jobs" are also a specialty in the Body and Fender shop. Students work on their own to customize their cars.

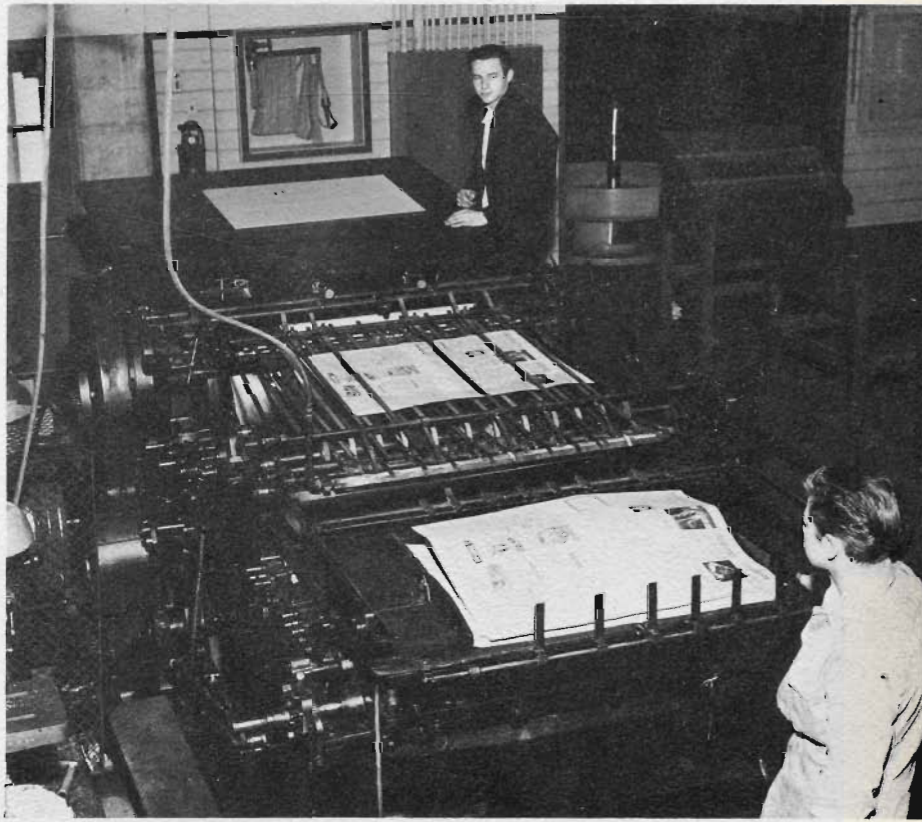

Industry

Electric Shop...

Looks complicated! Edison might have been confused at the maze of wires, although this member of the Electric Shop seems to know what he's doing.

Print Shop...

Stockton College's print shop is one of the best equipped in the state. This Miehle press runs off thousands of copies of school publications during the school year.

Machine Shop...

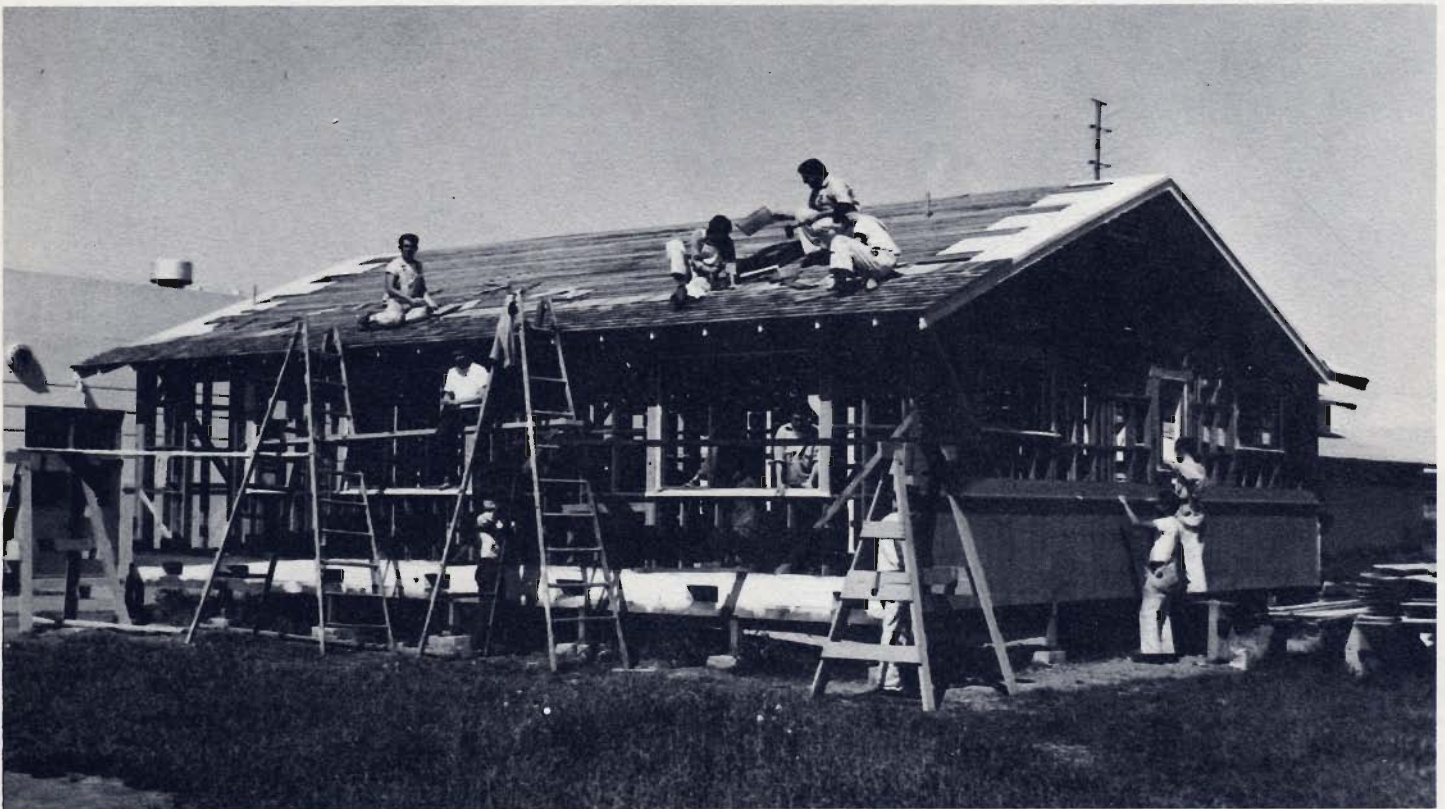

This shop serves as a laboratory for students who are interested in working with machinery. Its purpose is to help students gain skill in the use of various machine tools.

House in its early stages.

Something new has been added to the campus! Several shop classes have combined and are building a five-room house that will be auctioned off after it is completed in November.

Students taking pains to get everything just right.

Participating in the project are the carpentry, cabinet, electric, plumbing, paint and sheet metal shops. School projects of this nature aid students in readying themselves for future employment.

Agriculture

The new agriculture building erected this 1953-54 helped the agriculture department greatly in developing its facilities.

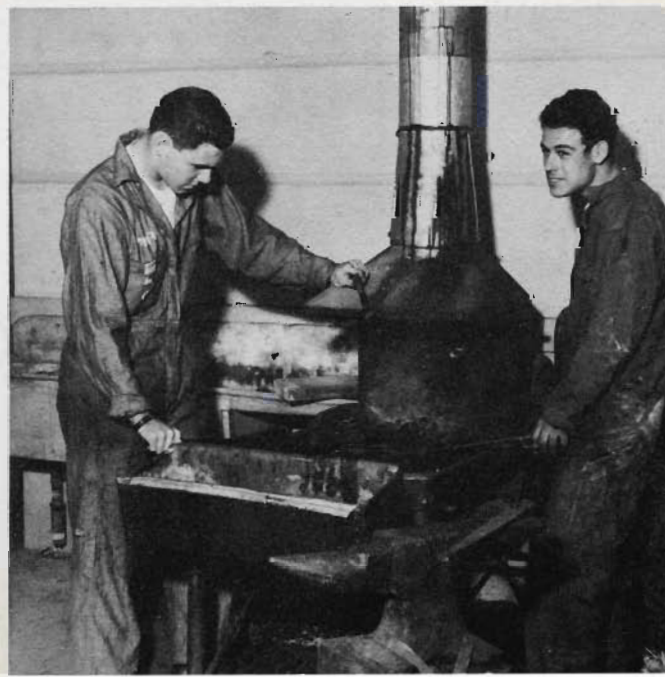

Students practice shearing sheep.

Here is an example of the modern conveniences available for the use of students.

The students in the agriculture classes learn how to raise and take care of different animals. The agriculture students used both sheep and chickens on the campus this semester.

Among the many types of agriculture classes at Stockton College are crop production, livestock production, specialized livestock, and specialized crops.

Science and ---

John Arnold

John R. Arnold has been division chairman of the Natural Sciences and Mathematics department for three years. He received his Ph.D. from Cornell University. He also teaches classes in zoology and entomology.

Astronomy...

Gazing at the stars --- through a telescope --- can be fun. Students in the Astronomy class learn about the solar system. Once a month the class has an evening meeting with the Stockton Astronomical Society. The Society usually has a well-known astronomer give a lecture to the class. The astronomy class also offers students the opportunity to make use of the telescope for study of the stars and planets.

Chemistry...

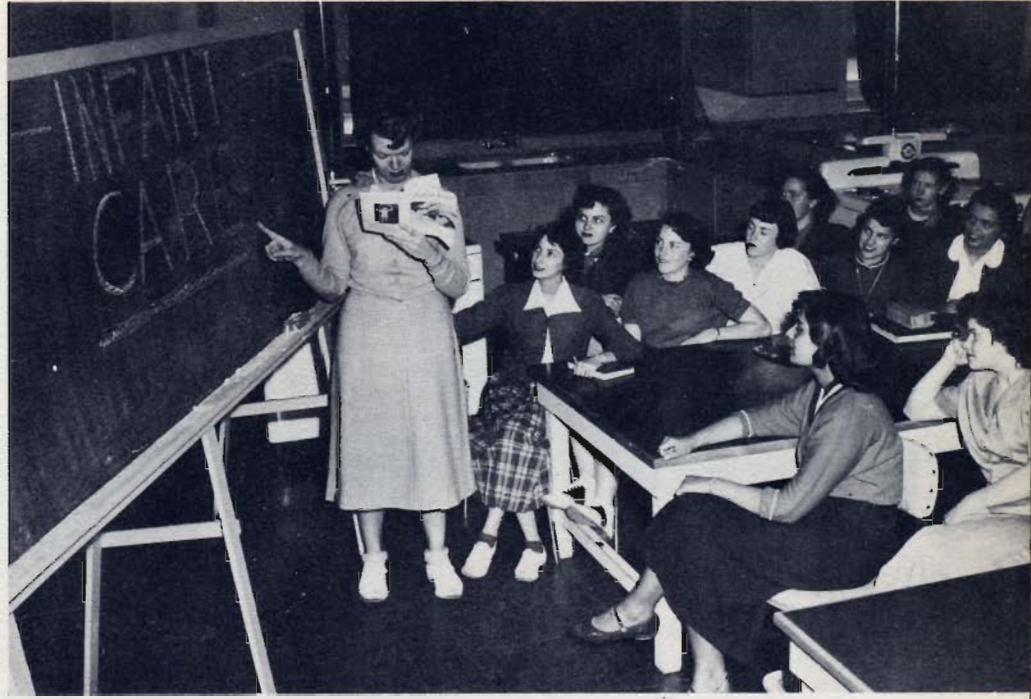

The science of Chemistry, which is the science of the elements and their compounds, is taught thoroughly in the several courses of chemistry at Stockton College.

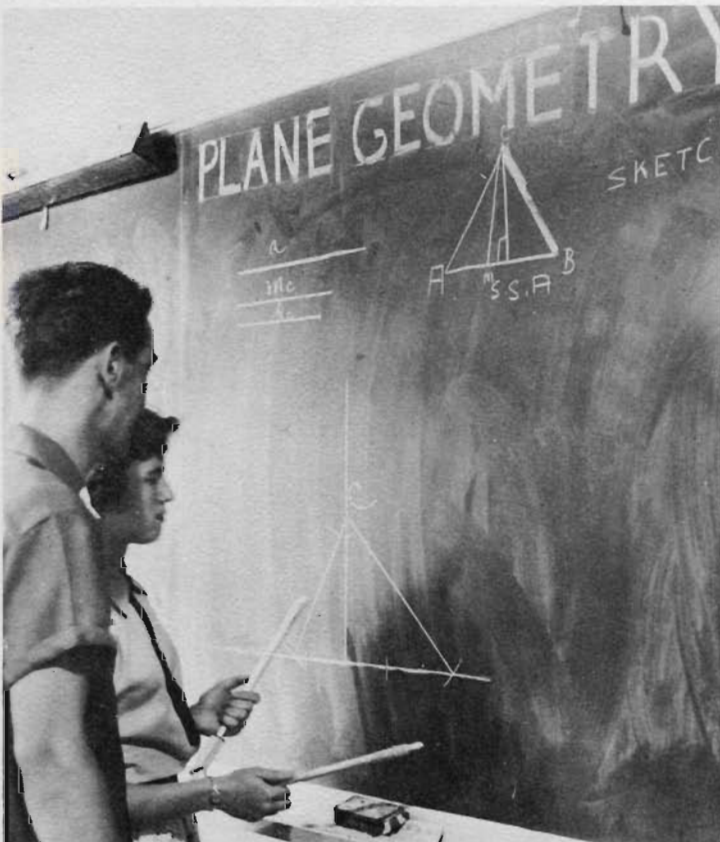

Home Economics...

Mathematics

Stockton College offers students a wide choice of Home Economics classes. Among the classes offered in this department are Clothing, Foods and Nutrition, Clothing Construction, and Foundations for Home Living. Both male and female students can enroll in most of these classes.

Mathematics...

Students in the mathematics classes learn the basic fundamentals and how to apply them to mathematical problems. Some of the classes offered are algebra, geometry, calculus, and trigonometry.

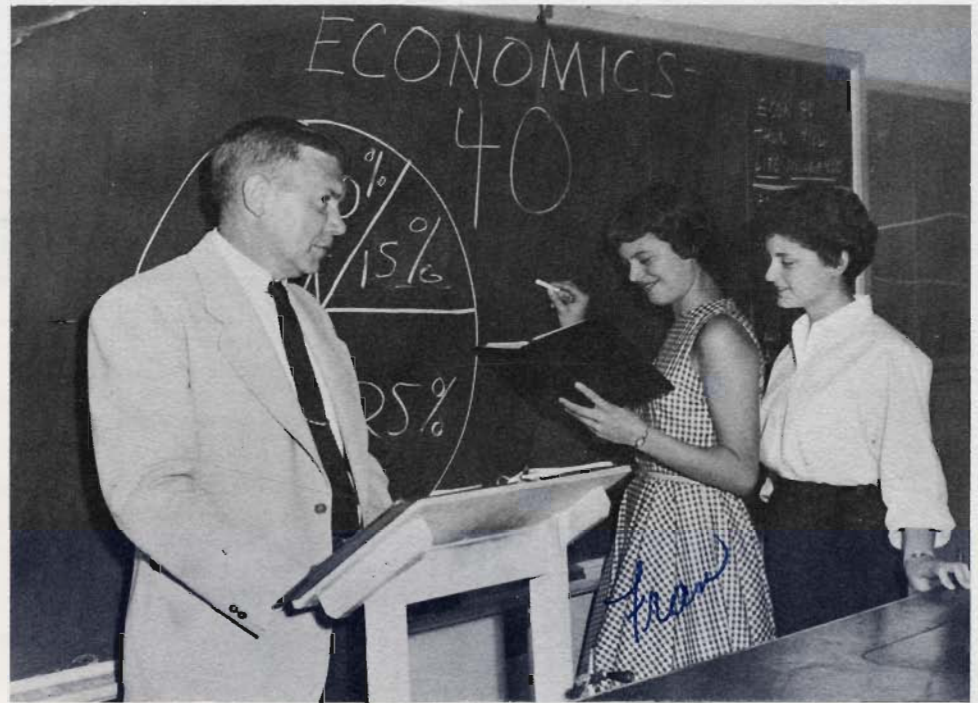

Social ---

Miss Lorraine Knoles

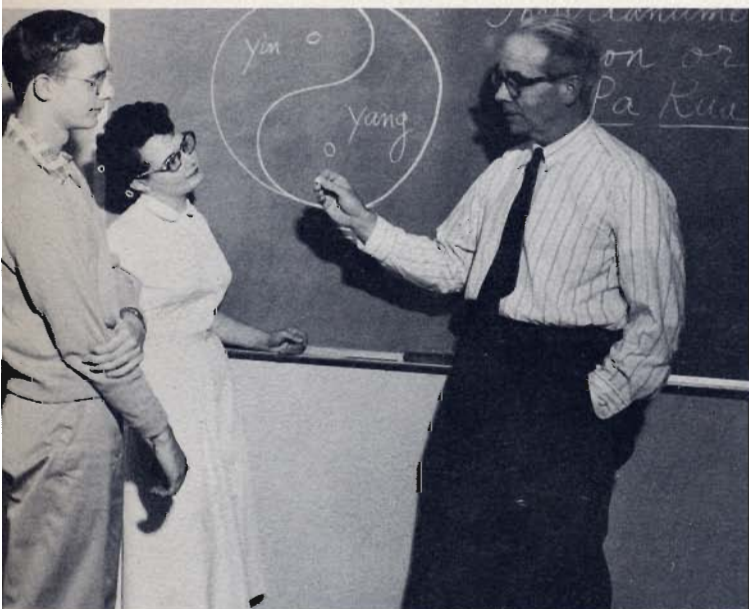

Miss Knoles is chairman of the Social Science department. She has been chairman since 1945. While attending College she majored in Industrial Arts. She is a charter member of Stockton College, and has taught History and Political Science.

Economics...

The Study of Economics has become vital and highly practical in this day and age. The main principals of economics are taught in the course of the same name. Personal Economic and Projects in Personal Economics are also popular courses.

Philosophy...

Students in philosophy classes study, discuss, and analyze the great ideas of the world. A study is also made of ethics and metaphysics in their aspects of philosophy.

Political Science...

Basic American ideals and institutions are studied in order to apply them to the understanding and analyzation of problems of the present.

Science

Sociology...

Students in sociology study individual and community problems in our ever-changing world. Sociology is one of the many courses the San Joaquin General Hospital nurses take at Stockton College.

Psychology...

The science of human behavior and its background and importance is taught in psychology as an aid for the greater understanding of man and his society.

History...

A survey of the social, economic, and cultural forces that contribute to the progress of America is taught in the U.S. History courses offered at both lower and upper division levels. The U.S. Constitution is stressed in the upper division as well as California history. A study of the history of Western Europe through ancient civilization to the present is also taught.
